

# Get Ready for AI with Cloud Managed Services

ADOPT CUTTING-EDGE AI TOOLS WITH CUBESYS'S VALUE-DRIVEN CLOUD MANAGED SERVICES

## WHY CUBESYS?

-  The cubesys team is now Copilot for M365 ready
-  10-year Microsoft partner and Tier 1 Microsoft Cloud Solutions provider
-  Microsoft Solution Partner accreditation in Azure Infrastructure with AVD and Azure Migration specialisations
-  ISO 27001 and 9001 accredited technology provider
-  Senior enterprise experience and Flexi-Advisory services accessible to all clients
-  Supplemental services available, including Website Hosting & Management, Network Management, Microsoft Dynamics & Power Apps, Hardware Procurement and Email Signature Management

## A SAFE, SECURE APPROACH TO AI

AI capabilities like Copilot for M365 will be a major competitive differentiator in the future. Copilot collaborates with tools you already use—like Microsoft Teams, Word, Excel, Outlook and more—to elevate your creative, drive innovation and propel your efficiency.

Before you add AI to your systems and operations, let cubesys conduct a Copilot Data Readiness Assessment of your current data governance policies and configurations to provide expert recommendations and suggested remediations.

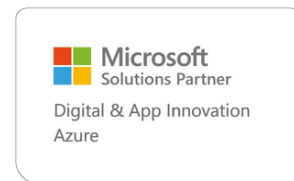

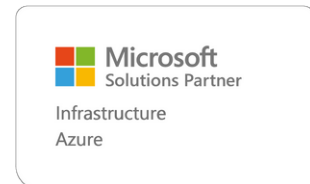

## ENTERPRISE-LEVEL IT SUPPORT

As one of Australia's leading Microsoft Partners, cubesys have extensive experience implementing Copilot and more advanced AI technologies. And now, we are making this enterprise-grade service available to small and midsize businesses.

Beyond AI implementations, our full suite of Cloud Managed Services enable organisations to maximise the value of their Microsoft 365 and Azure licenses; improve their productivity and efficiency; and optimise their staffing, licensing and operational costs.
